

# ECO101-3.0

## 100% Vegetable based solvent for Heatset Web Offset presses

### Introduction:

The target of Elettra is always focused on searching for the real possibility to improve the blanket washing process, creating an added value in the different phases of the printing process.

Elettra **ECO 101-3.0** has been designed with the aim to have the maximum cleaning power and the maximum safety in the dryer (no dryer stop for solvent vapors excess ) to strongly enhance the chemical action of the cleaning process for the Web presses.

The best result is obtained by using **Elettra ECO 101-3.0** always in combination with **Elettra ECO CLOTH MESH** cloth

### Features:

- o Economical in use
- o Environmentally friendly vegetable based cleaning agent for automatic washing systems
- o Safe for nature 0% VOC / 100% hydrocarbon free
- o Only "pure" raw materials (not recycled or filtered or.... )
- o Respectful of the most restricted rules related to the environment
- o **Elettra ECO 101-3.0** complies with customer's products certifications Blue Angel, Nordic Swan

### Advantages/Performance:

- o Fastest back-to-color after washing
- o Strong reduction of washing time and waste copies
- o Very good washing results with uncoated papers
- o Very high dryer safety level
- o Optimized use of cleaning agent

### Product data:

<b>Flash Point</b>	>160°C	
<b>Ordering code</b>	210liters	Elettra code 9000170-66
	1000liters	Elettra code 9000170-67
<b>Note</b>	It is possible to order higher quantities multiple of 1000 liters using the <u>Elettra code 9000170-77</u> and specifying how many liters are needed	
<b>Approvals</b>	Certificated by <u>Fogra</u> , <u>BG</u> and <u>OEM approved</u> (manroland heatset web presses)
