

# ECO101-0.0

## 100% Vegetable based solvent for Heatset Web Offset presses

### Introduction:

The target of Elettra is always focused on searching for the real possibility to improve the blanket washing process, creating an added value in the different phases of the printing process.

Elettra **ECO 101-0.0** has been designed with the aim to have the maximum cleaning power and the maximum safety in the dryer (no dryer stop for solvent vapors excess) to strongly enhance the chemical action of the cleaning process for the Web presses.

### Features:

- o Economical in use
- o Environmentally friendly vegetable based cleaning agent for automatic washing systems
- o Safe for nature. / 100% hydrocarbon free
- o 0% VOC for EU, 100% VOC for USA. This product is biodegradable in time it is considered safe for nature and humans healthy.
- o Only "pure" raw materials (not recycled or filtered or.... )
- o Respectful of the most restricted rules related to the environment

### Advantages/Performance:

- o Fastest back-to-color after washing
- o Strong reduction of washing time and waste copies
- o Very good washing results with coated papers
- o Suitable to use for UV ink cleaning
- o Very high dryer safety level
- o Optimized use of cleaning agent

### Product data:

**Flash Point** >160°C

**Ordering code** 210liters

1000liters

**Note** It is possible to order higher quantities multiple of 1000 liters specifying how many liters are needed

### Approvals

Elettra, using Fogra procedure.
